

ARCHITECTURE IN / FROM AUSTRIA

The professional handling of natural resources is at the centre of today's developments in energy politics and building culture. In these areas Austria has been exemplary in technical and design achievements in recent decades. The exhibition "Form & Energy" displays a selection of projects from various building sectors which realize innovative construction using renewable materials and which offer sustainable concepts for urban planning and architecture in the areas of education, culture, sports, trade, industry, and communication. The 60 projects are grouped according to the following themes: Primary energy, transportation energy, ecological construction, mental energy, physical energy, financial energy, production and distribution.

Austrian Travelling Exhibition from Austria

FORM AND ENERGY

LOCATING / PRACTISING SUSTAINABILITY

The symposium "Energy and Density" responds to the Austrian travelling exhibition "Form and Energy" by gathering architects, researchers, and developers to elaborate further on the topic of sustainable design. Against the background of their experiences in European and Asian contexts, panelists will locate the topic of sustainability topographically, culturally and technologically, and share their insights on forms and possibilities of practising sustainable architecture and urban design.

Speakers include:

Stefan Beck (Baumschlager Eberle Architects)
Joshua Bolchover (HKU)
Diane Kolaritsch (Swire Properties Limited)
Hon Patrick Lau (LegCo member)
Bernard Lim (AD+RG, CUHK, HKIUD)
Roger Riewe (rieglerriewe architects, TU Graz)
Tong Chung Wan (Great Eagle Development)

Convenor: Esther Lorenz (CUHK)
Organizer: School of Architecture, CUHK
Sponsors: Austrian Trade Commission HK,
and School of Architecture, CUHK

Date: Wednesday, Sept 14th, 14:00-18:00
Free admission.
